Wireless Control Solutions

Bluetooth Mesh Commercial Grade Lighting Control Systems

Affari Lighting Solutions offers a complete stand-alone wireless system to control lights in a wide variety of applications. The system includes wireless fixture controllers, switches, and occupancy/daylight harvesting sensors all using Bluetooth® wireless technology. In addition to the system devices we also offer a fixture mounted controller and sensor with Bluetooth technology providing wireless communication and occupancy/daylight harvesting control in one device.

Each Bluetooth enabled device is its own wireless node for sending, receiving and sharing control commands through a wireless mesh network. Expandability is easy with each device passing information to the next thus expanding the reach and control throughout the network.

Architecture-Bluetooth Wireless Network

Simplicity

- Bluetooth wireless technology provides reliability, redundancy, and easy expandability
- Devices communicate over a secure Bluetooth wireless network
- Smartphones with Bluetooth antenna can configure and control lights with the complimentary Keilton App
- Network bridges and onsite internet are not required
- Bluetooth Controller and Sensors are line powered for long term reliability and performance.

System Functionality

- Networking of luminaires
- Individual Addressability
- Occupancy sensing
- Daylight Harvesting/Photocell Control
- High-end Trimming
- Flexible Zoning
- Continuous Dimming

Devices

Affari Lighting Solutions Lighting Controls Commissioning & Controls App by Keilton

- For Bluetooth enabled iOS or Android smartphone
- Commissioning: Switch on-off, Dimming,
- Colour tuning / Circadian Rhythms (Must work with corresponding drivers and led fixtures)
- Flexible zoning / Scenarios setting / Scheduling
- Wireless wall switch linkage setting
- Occupancy sensor setting, Daylight harvesting, Photocell control
- Admin control authority sharing with QR code

PPA102S

FA102

WPPA102

Bluetooth Controller

- Converts fixtures into wirelessly controlled luminaires
- Provides individual or multi-fixture control
- ON/OFF (relay) and 0-10v dimming control of the fixture(s) through a Bluetooth Switch or App

| Models | Input | Technique | Installation |
|---------|---------------------|-----------------------|--------------|
| PPA102S | 120-277V AC / 3Amps | Single / Dual Channel | External |
| FA102 | 12V DC | Single Channel | Internal |
| WPPA102 | 12V DC | Single Channel | External |

Devices

WP1025

Bluetooth Wall Switches

- Fingertip control over lights in defined zones
- Linkable with One / Multiple zones, 5-buttons
- Switch on-off, Dimming
- Support switching prestored three scenarios
- Faceplates included

| Models | Input |
|--------|--|
| WP1025 | Wireless, powered by 2pcs CR2032 battery |

EFS104

EFS107

IFS105

Bluetooth-mesh Motion & Daylight Harvesting Sensor External Installation

- Provides automated individual and group control of light fixtures
- Occupancy (PIR) and daylight harvesting sensor
- ON/OFF/0-10V dimming
- 40' coverage radius on 40' ceiling

| Models | Input | Application | Installation |
|--------|-------------------------------------|-----------------|--------------|
| EFS104 | 120-277V AC / 5Amps | High bay sensor | External |
| EFS107 | Powered by 12-24V DC or PPA103S | Ceiling mount | External |
| IFS105 | Must Power by PPA102S, zone control | Ceiling mount | External |

Devices

Preferred Fixture Integrated Bluetooth Controller & Sensor

- Achieve all functionalities as EFS104/EFS107

| Models | Input | Technique | Application |
|-------------|------------------------------|---|---|
| EFS106 | 12V DC / 3.5mm Audio Plug-in | Bluetooth mesh, PIR&Daylight harvesting | Linear, UFO highbay, wall pack area light |
| IFS108 | 12V DC / integrated | Bluetooth mesh, PIR&Daylight harvesting | Panel, troffer, super thin fixtures |
| IFS105S /SE | 12V DC / integrated | Bluetooth mesh, PIR&Daylight harvesting | Mini size, fit into various luminaires |
| IFS105E | Must Powerd by FA102 | PIR&Daylight harvesting | Mini size, fit into various luminaires |
| MWS105 | Must Powerd by Fa102 | Microwave&Daylight harvesting | Mini size, fit into various luminaires |

Fixture integrated IoT sensor and controller OEM Guide

Luminaire level lighting controls

Add functionality and IoT readiness to your luminaires with an easy to install system

Maximize lighting performance, increase occupant satisfaction

Luminaire level sensor and controller are designed to be integrated directly into luminaires. These Luminaire Level Lighting Controls can be deployed as independent occupancy and daylight fixture sensors, or easily networked with controllers using the Keilton App for room, area, or floor lighting controls. The devices are part of Affari Lighting BLE family of networked lighting controls solutions. This allows them to communicate with other wireless switches, sensors, and load controllers and our wired Dialog system for building-wide advanced lighting controls strategies.

IFS108

EFS106

ASHRAE 90.1 Compliant

By incorporating the same technology in both small and large systems, Affari Lighting Solutions products specially designed to support small individual offices or to easily scale up to large commercial spaces, delivering compatibility, reliability, and commonality to the entire facility.

Features

- Sensor and sensor-less models for cost effective scalability
- Two 0-10V channels to support standard and tunable white LED drivers
- DIM-to-OFF for effective dimming and energy efficient functionality
- UL2043 capabilities without any additional wiring
- Small form factor to fit into standard ½ inch electrical knockouts
- Bluetooth wireless technology for security and reliability
- Bluetooth beacons for IoT and location services strategies

IFS108 installed in the standard troffer

Overview

Affari Lighting Solutions fixture sensor and controller support single and dual channel 0-10V dimming LED drivers and are powered by the driver's 12VDC auxiliary power output. They are designed to fit directly into standard 1/2" electrical knockouts and are networked using Bluetooth Wireless Technology. The system is commissioned and configured via a free app on the iTunes App Store and Google Play Store (Keilton). This app uses the on-board Bluetooth Technology on the iOS product to configure and commission the devices and system. IFS108 and EFS106 are also part of our wireless lighting control ecosystem which includes load controllers, occupancy/daylight sensors, and wall switches, each using Bluetooth communication technology. The Keilton Bluetooth system is Title 24 compliant. It can provide all the necessary control schemes for Occupancy (Occupancy, Vacancy, Partial ON, Partial OFF), Primary & Secondary Daylight Harvesting, and Demand Response.

Bluetooth Lighting Control Ecosystem

Design, Dimensions, Specifications

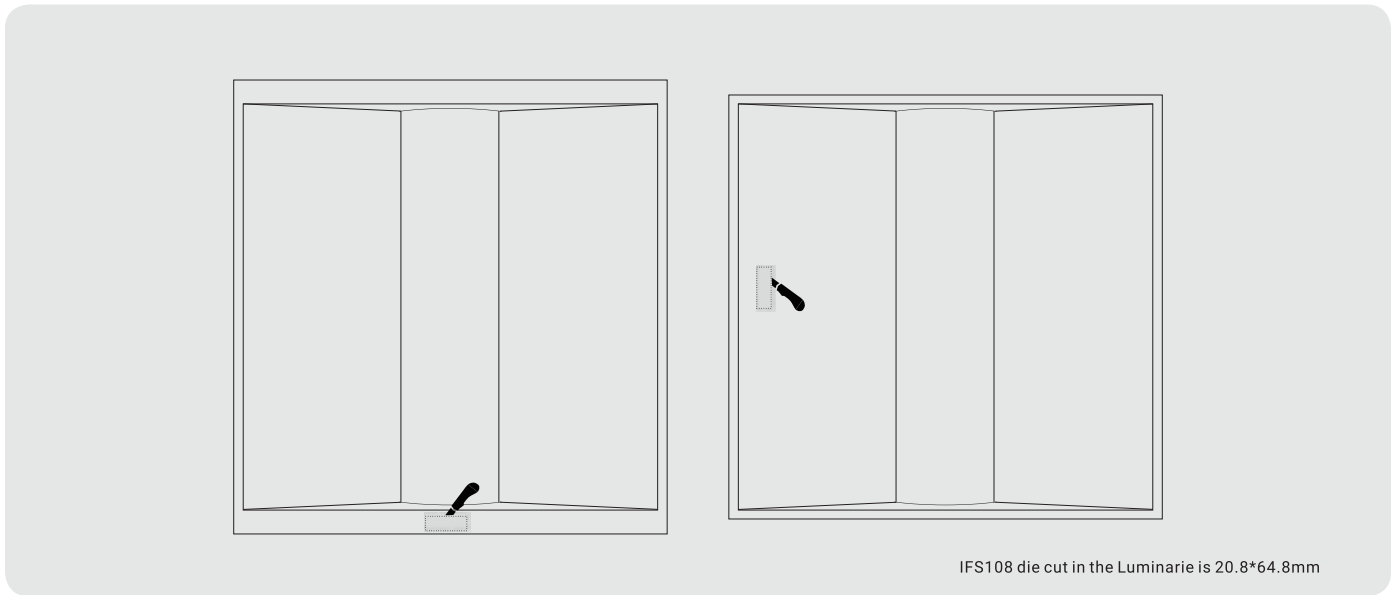

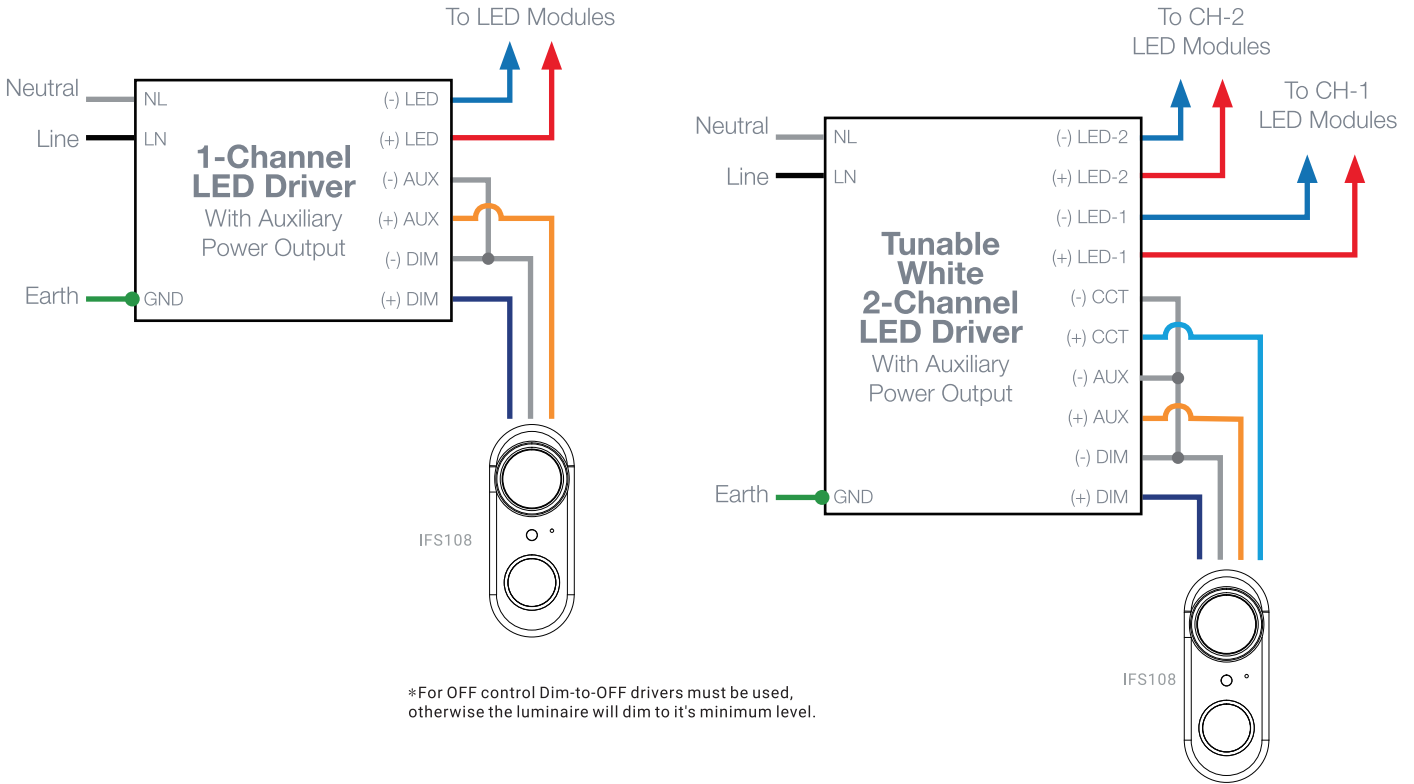

| FIXTURE INTEGRATED BLUETOOTH CONTROLLER & SENSOR | | | |
|--|---|---|--|
| Models | Input | Technique | Application |
| EFS106 | 12V DC / 3.5mm Audio Plug-in | Bluetooth mesh, PIR&Daylight harvesting | Linear, UFO highbay, wall pack, area light |
| IFS108 | 12V DC / integrated | Bluetooth mesh, PIR&Daylight harvesting | Panel, troffer, super thin fixtures |
| IFS105S/SE | 12V DC / integrated | Bluetooth mesh, PIR&Daylight harvesting | Mini size, fit into various luminaires |
| IFS105E | Must Power by Fa102 | PIR&Daylight harvesting | Mini size, fit into various luminaires |
| MWS105 | Must Power by Fa102 | Microwave&Daylight harvesting | Mini size, fit into various luminaires |
| KEILTON LIGHTING CONTROLS DC 12V BLUETOOTH NODE | | | |
| Models | Input | Technique | Application |
| FA102 | 12V DC | Bluetooth Node, power IFS105E / MWS105 | Mini size, fit into various luminaires |
| WPPA102 | 12V DC / 3.5mm Audio Plug-in | Bluetooth Node, linkable with EFS106 | Linear, UFO highbay, wall pack, area light |
| WIRELESS RANGE | <ul style="list-style-type: none"> • 100ft clear line of sight • Distances may vary based on location and environment • Additional devices may be required at time of commissioning to ensure Bluetooth network integrity | | |
| ENVIRONMENT | <ul style="list-style-type: none"> • Indoor stationary, non-vibrating, non-corrosive atmosphere, and non-condensing humidity • Operation temperature 32° F to 131° F (0° C to 55° C) • Storage temperature -40° F to 140° F (-40° C to 60° C) | | |
| DIMMING | <ul style="list-style-type: none"> • Two 0-10 Dimming channels, each capable of sinking up to 30mA • Typical use is with single channel 0-10V LED driver providing aux output power and dim-to-off capability • May also be used with dual-channel, tunable white LED drivers providing aux output power and dim-to-off capability | | |
| CERTIFICATIONS | <ul style="list-style-type: none"> • UL2043 (Plenum), UL FLTJ rated • May be installed through a knockout in the luminaire wiring enclosure or installed external to the enclosure and power with Class 2 circuit using Class 2 wiring method | | |
| WARRANTY | <ul style="list-style-type: none"> • Standard 5-year warranty | | |

Wiring

Devices are positioned in luminaires and wired directly to LED drivers for power and control commands (see our Design-in Guide for installation information).

Die Cut for IFS108 in troffer.
